The above list package consists of:

1. Infrared
2. Infrared for
3. Infrared for
4. Infrared for
5. Infrared for
6. Infrared for

### Breasting Infrared's auto update software for the first time

1. You must first have the latest version of the software installed on your computer.
2. Plug your Infrared into your computer using the supplied USB cable.
3. Check that nothing is running on your computer that might interfere with the software update.
4. Run the software update program.

### How to read / clear trouble codes

1. Turn on your vehicle's ignition, you will get a screen with the following information: "Please select a vehicle model."
2. Select the vehicle model you want to read the codes for.
3. The codes will now be displayed on the screen. To clear the codes, press the "Clear" button.

## QUICK Start Guide

### Getting started

1. Connect the Infrared to your vehicle and plug the software into your computer. Please refer to the manual for more details.
2. After the software has been installed, you will be prompted with the following screen:

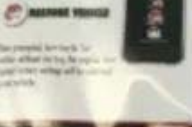

### How to tune your vehicle

1. Select "TUNE VEHICLE" from the main menu.
2. Select "NEW VEHICLE" from the "TUNE VEHICLE" screen.
3. When prompted, provide the "VIN" number without including the region.
4. Once your vehicle is recognized, select your vehicle type. Your vehicle will automatically be tuned.
5. You will be asked to wait for the software to tune. Once the process is complete, you will see a "TUNE" screen.
6. The software will now be ready to use. To read the trouble codes, press the "Read" button. To clear the codes, press the "Clear" button. To exit the software, press the "Exit" button.
7. Do not disconnect the Infrared from your vehicle. The process will be interrupted.

### How to restore your vehicle's stock factory settings

1. Select "RESTORE VEHICLE" from the main menu.
2. Select "RESTORE VEHICLE" from the "RESTORE VEHICLE" screen.
3. When prompted, provide the "VIN" number without including the region. Your vehicle's factory settings will be restored.

### How to read / clear trouble codes

1. Select "READ CODES" from the main menu.
2. Select "READ CODES" from the "READ CODES" screen.
3. You will see the vehicle's trouble codes on the screen.
4. To clear the codes, press the "Clear" button.
5. To exit the software, press the "Exit" button.
